For Today's Office Duplicating

The D-490 MimeoPrinter successfully combines the basic principles of a modern printing press with the simplicity and economy of the mimeograph. With this full-duty machine, high printing costs and delays in the production of office printing will be substantially reduced. Forms, letterheads, price lists, direct mail and illustrated catalog sheets are quickly and easily produced with printing quality at a fraction of normal costs.

Bohn Rex-Rotary MimeoPrinters are printing presses that use stencils instead of metal plates. Operating on a totally new principle, MimeoPrinters eliminate inking with a brush, changing messy ink pads, cleaning clogged drums. Because there is never any contact with ink they are absolutely clean to operate, clean to maintain.

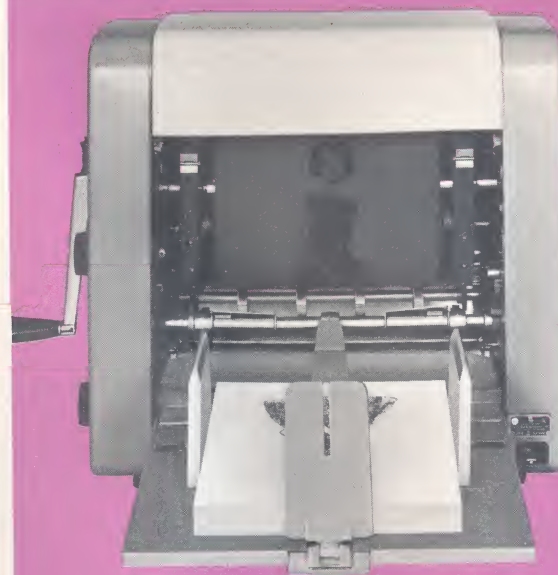

Compare the features and capability of the D-490 with any other mimeograph you have ever seen. You will agree it is the finest office duplicator produced. Your Bohn representative will gladly give you additional information or a demonstration in your office.

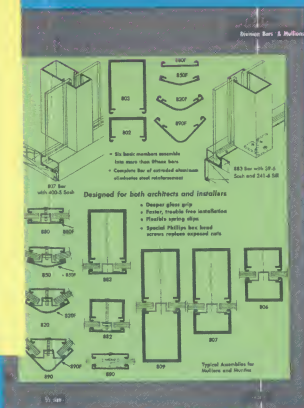

The Bohn Electro-Rex Stencil Cutter

An Electro-Rex Stencil

The Bohn Rex-Rotary Model D-490

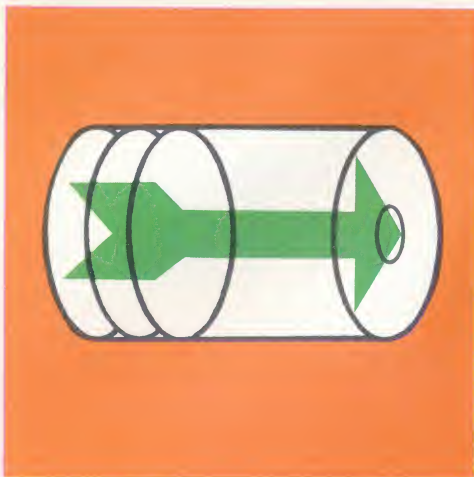

A Complete Printing Capability In Your Office

Now, for the first time, a complete low cost printing facility is available to every office. In combination with the Electro-Rex, the D-490 MimeoPrinter offers the capability of printing *all* of your office requirements — forms, letterheads, sales bulletins, catalog sheets, charts, etc. The Electro-Rex electronically scans any original copy—type, line drawings, photographs—and creates a stencil that will produce up to 10,000 copies. Quality of printed pieces is excellent with high fidelity to original copy. Entire printing jobs can now be produced internally—layout, paste-up, stencil-cutting and printing—at a saving often exceeding 50% of outside costs.

Your Bohn Rex-Rotary franchised dealer maintains a complete Electro-Rex stencil cutting service for those MimeoPrinter users whose requirements do not justify their own Electro-Rex machine. Efficient, low-cost 24 hour service on all stencil needs is available in most communities. Try this convenient service; ask your dealer to make an Electro-Rex stencil for you.

FULLY AUTOMATIC INKING

Setting convenient dial automatically feeds printer's paste ink from a sealed cartridge to the printing cylinders and stencil in correct amount to insure perfect copies.

QUICK, EASY COLOR CHANGE

Interchangeable inking system allows operator to change color in less than 3 minutes. Adds greatly to versatility of machine, makes multicolor jobs routine.

VARIABLE SPEED CONTROL

Adjustable speed control dial selects machine speeds up to 10,000 copies per hour. Choosing correct speed for each run guarantees better feeding and delivery.

PERFECT REGISTRATION

Positive control of paper from feed table to delivery tray guarantees perfect registration. Allows confident planning and printing of forms and multicolor work.

PAPER SIZE—PRINTING AREA

Feeds paper from 3 x 5 to 9 x 15. Prints area 8½ x 14. Post cards are run easily without attachments as are all weights of paper from tissue to cardboard.

FULL REAM FEED

Takes a full 500 sheets of 20# mimeo paper. Feed table automatically rises as copies are run; feed arm disengages when paper pile is exhausted.

AUTOMATIC COUNTER

Counter, pre-set by operator, shuts off machine when desired number of copies are run. Accurate count prevents costly overruns, wasted production.

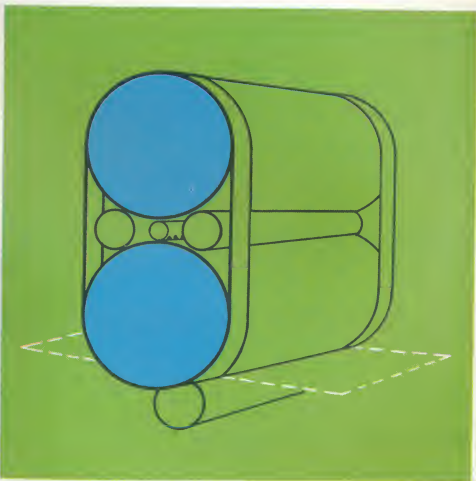

COPY CONTROL

Stencil easily corrected for straightness by angular control on clamp. Copy height is adjustable, while machine is running, a full 2 inches up or down.

CLEAN WORK—CLEAN WORKER

Fast-drying paste ink prints sharp, does not spread on paper. Sealed in cartridge, ink never leaks or drips; operator and equipment stay neat and clean.

EXCLUSIVE PRINTING PRESS PRINCIPLE

Like a printing press, MimeoPrinters use oscillating rollers to distribute ink over the entire printing area, do not leak ink through a drum like old type mimeographs.

Model D-490

*a full duty stencil duplicator
to fill every office requirement*

Strikingly styled to complement the most beautiful office, the D-490 has been engineered for simplicity of operation and quality of finished copy. Manufactured of the finest materials, it is fully guaranteed to produce, day after day, the varied duplicating requirements of the most demanding office.

The D-490 has completely eliminated the pronounced disadvantages of old type drum mimeographs. With this modern MimeoPrinter anyone can produce high quality duplicated copies from any original copy—type, charts, line drawings, photographs—in any number of colors, *cleanly, quickly, efficiently, economically.*

Your Bohn Rex-Rotary representative can, in a few minutes, now prove to you that you can have a “printing plant” capability right in your own office.

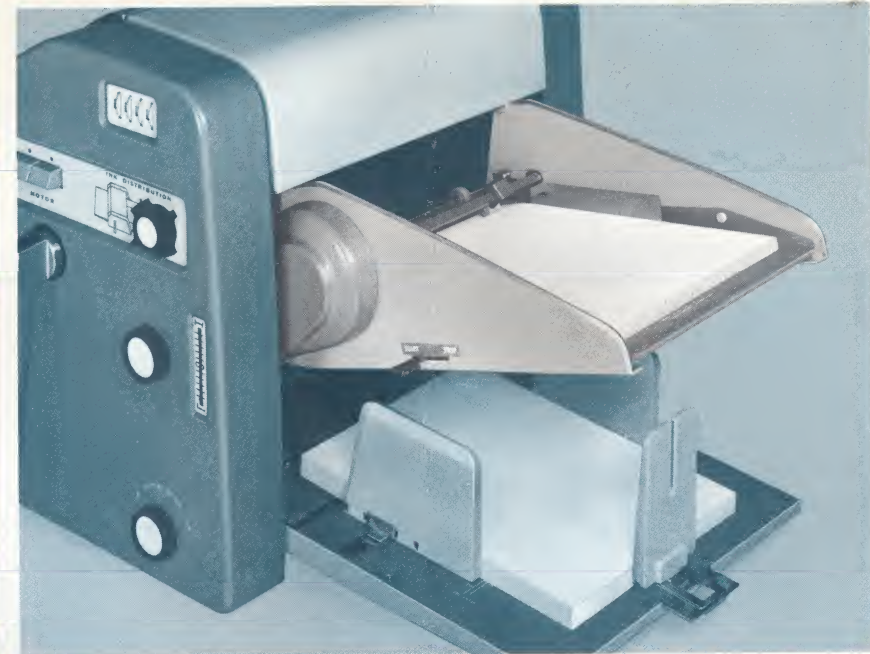

Paste ink cartridge is easily inserted in MimeoPrinter. Ink required is selected on the calibrated dial and is fed automatically throughout the run. Paste ink cannot drip or leak, never touches hands.

THE D-490 DF

A double-size machine with every feature of the Model D-490, it offers an extra large printing area and paper capacity. Feeds a single sheet 18 x 15 or *two* legal size (8½ x 14) sheets simultaneously. This extra-size model greatly increases capability and production; allows printing from a 3 x 5 card to a full 17 x 14. Easily prints 4-page, 8½ x 11 folder. Will run a double legal size stencil, a single legal size stencil or two legal size stencils side by side.

COLLATOR AND SLIPSHEETER

This low-cost, simple to attach option to the Model D-490 or D-490 DF allows interleaving of blank or previously printed sheets between every sheet being delivered through the duplicator. It permits automatic slipsheeting of any job or will act as collator for a two-page letter. This versatile attachment will improve reproduction quality and save many hours of labor.

Bohn Business Machines distributes through your Bohn Dealer a complete line of the highest quality duplicating supplies to complement its MimeoPrinter. These include a comprehensive line of exceptionally fine stencils, ink, cabinets, mimeo paper, duplicator paper, correction fluid, stylii, layout pads, etc. To insure perfect quality of copies, ease and economy of operation, and long life of equipment, depend on the recommendations and experience of the duplicating specialist in your area, the Bohn Rex-Rotary dealer.
